60cc Pharmaceutical Cylinder with 28 mm Lined Squeeze-and-Turn Closures

Drug Plastics is proud to present a complete package with the 60cc Pharmaceutical Cylinder and 28mm Lined Squeeze-and-Turn Closure combination. The cylinder has a 60cc volume, which makes this bottle ideal for smaller dose products of pharmaceutical tablets and capsules. The 28mm neck finish allows for easy filling and controlled dispensing of product. The complementary Lined Squeeze and Turn closure provides the functional security of child resistance along with a variety of lining material options that can provide tamper evidency and protect integrity to the product.. **Please contact your Drug Plastics sales representative to discuss your specific needs and application.**

Characteristics:

- Wide-Mouth allows for ease of small tablet dispensing
- 60cc size perfect for small unit dose pharmaceutical products
- Small size also great for sampling
- Closure wall sits flush with wall of bottle to complete sleek package for great OTC presence
- Child-Resistant Squeeze-and-Turn closure has pictorial instructions on top and tabs on side for clarity of opening
- Various lining material options that enhance product integrity
