

# Quality products that deliver value

Premium cannabis packaging

Tell us  
about your  
packaging  
challenges.

Our **FreeStyle™** line of bottles and closures is built upon 50 years of experience helping pharmaceutical and nutraceutical companies navigate complex regulatory and packaging challenges. We can do the same for your company. We'll help you navigate and comply with an increasingly regulated cannabis industry. You can expect packaging solutions that increase your profitability, reduce your risk, and enhance your brand.

## Custom Design and Manufacturing

We understand your cannabis product is special and that it needs to stand out. Our team helps you create the perfect packaging to highlight your product.

## Sustainable Resin Options

Choose from polyethylene resin produced from sugarcane ethanol or recycled PET. Both offer a more environmentally-friendly alternative than what traditional resins can.

## Made in the USA

All of our plastic bottles and closures are manufactured here in the U.S. We're proud to provide local jobs, support families, and build stronger American communities.

## Materials You Can Trust

FDA-approved resin, colorant, and liner materials are used for every order. Our ASTM-certified products mean total compliance with no surprises.
