

Our commitment

to providing premium products and service

Every product we offer is designed and manufactured to assist our customers with their mission of helping people live healthier lives. Promising perfection is a big responsibility, but one that assures our customers' products will be protected and safe to use. Despite having eight locations to meet the needs of our wide-ranging clientele, we have never forgotten our roots as a small family-owned bottle and closure company.

Whether it's your first time working with us or you're still considering our services, we look forward to building a lasting relationship with you. It's our promise to deliver each order with five key tenets in mind, every time.

Responsiveness: You'll get what you need quickly.

Courtesy: You'll be treated in a respectful, friendly manner.

Integrity: We'll have your best interests, and those of your customers, in mind.

Dependability: We'll do what we say we'll do.

Perfection: You'll receive perfect plastic bottles and closures every time.
