

Use Our HDPE and PET Resin Jar Family for Brand Consistency

Wide range of applications.

HDPE and PET jars are ideal for pharmaceutical, nutraceutical, and lifestyle brands that package solid dose medications, powders, ointments, gels, creams, and edibles.

Consistent look for different quantities.

Available in three sizes: 75cc, 120cc, and 230cc. Our exclusive 53mm SecuRx® child resistant closure works with all sizes, and provides brand consistency for your product line.

Maximize filling line efficiencies.

Each jar has a uniform diameter and a 53mm neck finish. Dimensional similarities eliminate the need for costly changeovers for closures and require no changes to filling line rails.

Tamper evident security built in.

The molded shrink band bead creates a tamper evident security feature when the jar is shrink wrapped to the closure. Optional heat induction liner is available as a tamper evident feature.
