

Exclusive Pop & Click™ Packaging

A Breakthrough in Usability and Safety

Available in multiple sizes and styles.

Pop & Click bottles work well with a broad range of products, varying quantities, and diverse brands. All bottles are ASTM-certified and made from FDA-approved HDPE.

Ideal for solid dose, creams and more.

The 38mm polypropylene closure contains an integral TPE liner that acts as a re-seal gasket and protects the contents from the external environment.

More effective child resistance.

Passed full CPSC protocol with 100% effectiveness before demonstration and 98% effective after demonstration.

More senior-friendly.

86% of seniors tested rate it easier to open than other child resistant systems. Multiple hands-free opening and closing options make it a winner for seniors and those with limited finger mobility.

Creates a “wow” response.

Differentiates your product packaging from the competition due to the unique look and the way it opens. Pop & Click creates a contagious buzz that attracts consumers to your brand.

Reduces carbon footprint.

Compared to a traditional 38mm push & turn CRC system, Pop & Click closures use almost 65% less plastic, making them a great choice for environmental sustainability.
