

A Family of Pop & Click™ Cylinders

Achieve Greater Sustainability with Pop & Click Packaging

The unique design of our exclusive **Pop & Click Packaging** creates a “wow” factor and differentiates your brand from the competition.

These innovative closures are child resistant for compliance and security. They have an easy-to-use closure system, especially for individuals who struggle with traditional CR closure systems.

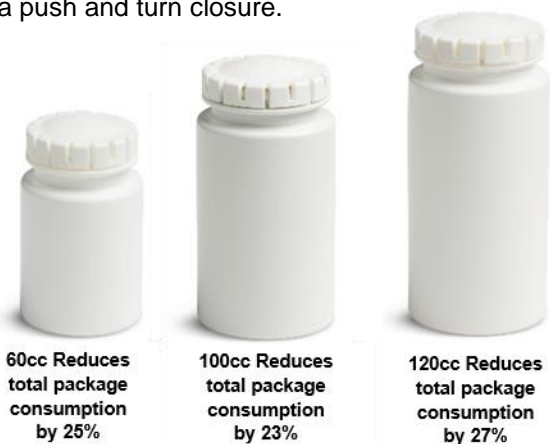

Consistent look for different quantities.

Pop & Click Cylinders are available in three sizes: 60cc, 100cc, and 120cc. The special 38mm finish allows the cylinder and the closure to work together, to create a CPSC-approved child resistant container that provides brand consistency for your product line.

Supports source reduction.

Exclusive Pop & Click closures are one-piece closures that use up to 65% less plastic than a comparable 38mm Push and Turn Closure. When you use the entire Pop & Click system, plastic consumption is reduced over a similar cylinder with a push and turn closure.

60cc Reduces
total package
consumption
by 25%

100cc Reduces
total package
consumption
by 23%

120cc Reduces
total package
consumption
by 27%

Creates excitement around your brand.

This system is an attention-getter. The unique look and novel way it opens differentiates your packaging from the competition. It creates new excitement around your brand and helps to attract more consumers.

More child resistant.

With 100% effectiveness before demonstration and 98% effectiveness after, Pop & Click packaging passes full CPSC child safety protocol with outstanding results. This packaging system deters inquisitive children.

More senior-friendly.

86% of seniors tested rate Pop & Click packaging easier to open than other child resistant systems. Hands-free opening and closing options make Pop & Click a great choice for seniors and those with limited finger mobility.
